VisualCV Spot #2

VisualCV Spot #3

Welcome to My VisualCV!

You're looking at my new VisualCV. We've reinvented the resume here at VisualCV.com and will soon revolutionize career management. Read more about **our company**, the **benefits** of having your own VisualCVs, and once you've reviewed my VisualCV — **get started** creating your own. Or you can register your business for a **Company VisualCV**. Have fun, and let me know what you think...

About VisualCV, Inc.

VisualCV allows professionals to create an online professional profile that replaces the traditional resume. Available to both professionals and companies, VisualCV revolutionizes how these groups share and organize career information. Your information is completely private and you control access to your VisualCVs. Top companies around the country are currently signing up to start receiving VisualCVs in lieu of the traditional Word resume. Companies are also creating VisualCVs to exhibit and share information regarding their culture, job opportunities, career potential and more.

VisualCVs, for professionals, can serve different purposes when sharing with friends, colleagues, clients, prospects, the Internet, and Recruiters or Companies. Based on your preferences, each version has its own security criteria and unique collection of portfolio items. Professionals have the option to share a unique URL as a "live" Internet document that includes portfolio items such as work history and samples, salary information, awards, references, certifications, videos/photos and more. VisualCVs also include informative pop-ups, hovering over companies, universities and keywords — eliminating research for you and your reader. Sharing a VisualCV makes every meeting more effective and every relationship a better fit.

Registration for professionals and companies is easy and free. **Get started today!**

Education

University of Southern California - School of Engineering

Aug 1989 - Dec 1993
Los Angeles, CA

BS, Electrical Engineering

Web Testing Tools

Quality Open-Source QA Projects

Tools like **Watir** and the **Selenium** suite are helping to produce quality Web 2.0 sites, and helping to reduce their time to launch.

Agile Principles

The **Agile software methodology** values individuals and interactions over processes and tools, working software over comprehensive documentation, customer collaboration over contract negotiation, and responding to change over following a plan.
