Founder

Voltage Capital

Voltage Capital is a private investment firm focusing on opportunities in high technology, digital media, consumer products, and healthcare sectors. We act as investors and entrepreneurs, launching new ventures as well investing in existing businesses with significant growth prospects. Voltage focuses on uncovering and creating unique situations where our combined expertise can create significant value.

Summary

Mouli Cohen, founder of Voltage Capital, is a successful entrepreneur who has founded and developed successful ventures in the biotechnology, high technology, digital media and entertainment sectors. He has balanced his success in business with extensive philanthropic activities. Over the years he has supported children's charities, food programs, medical research, and the arts as well as education projects both in the US and abroad. He is married to author Stacy Cohen. Mouli got started as an investor in biotechnology with an early stake in Teva Pharmaceuticals. He continued as an investor in several successful biotech startups including Biosense, a cardiac imaging company sold to Johnson and Johnson in 1997, and Icos, a discoverer and developer of treatments for inflammation and other diseases, sold to Eli Lilly in 2006.
