University of Nerdology

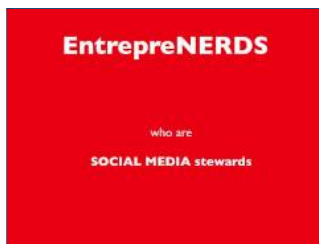

Technology changes faster than course curriculum can at any tech institute. We stay on the leading edge with our own University of Nerdology. Melding the best of traditional IT training with ongoing real-world experience, our own virtual and fluid 'U of N' allows nerds to stay up to speed with the latest technology shifts that could bring dramatic results to your business.

Industry Certifications

While our team is full of nerds who have industry certifications - (Microsoft, Cisco, Information Security and all the other usual suspects), we also have nerds with very specialized training.

Every nerd on the team has access to every other nerd. When you contract Nerds On Site as your Technology Partner, you have access to the combined set of skills and certifications!

Complete IT OnSourcing

With the combination of on site support along with leading edge monitoring and remote support capabilities, we are ready and willing to provide you complete 'Peace of Mind' in exchange for your current IT stress and overhead.

We will 1) Assess, 2) Make recommendations, and 3) Implement an ongoing support plan to ensure that your systems work for you seamlessly and consistently.

As your company grows, we can bring more nerds and more skills to the table as required!

Nerds On Site Quick Facts

- Company founded in 1995, in Canada
- Currently operating in 10 countries
- Nerds work together as a TEAM to provide a FULL IT solution to Small and Medium Enterprises
- Client Satisfaction Rating of 96.5% on over 60,000 client surveys completed to date
- Up-front, solution-based pricing eliminates surprises

Objective

To become your TECHNOLOGY PARTNER and provide you complete 'peace of mind' support while helping your company realize the full potential of technology by leveraging it for increased Pleasure, Productivity and Profitability.

(Experience)

We did the math AND, on average...

Nerds On Site brings a MILLENNIUM (yup, 1000 years) of combined experience for every 82 nerds on the team!
